Stars	EX 53				
	MKP 427				
	PLC 120				
	VJD 913				
	ZQ 75				

Distances	Planets	Stars	Sizes
41 light years			
43 light years			
45 light years			
47 light years			
49 light years			

- Zhezios orbits star VJD 913..
- Hinveng is 4 light years farther away from us than Quael..
- The planet 49 light years from earth orbits star MKP 427..
- The planet 45 light years from earth, Kinucia, the planet with a diameter of 243,000 mi. and the planet orbiting star VJD 913 are all different planets..
- The planet with a diameter of 650,000 mi. is either the planet orbiting star PLC 120 or the planet orbiting star MKP 427..
- The exoplanet orbiting star EX 53 is either Quael or the exoplanet with a diameter of 650,000 mi...
- Hinveng doesn't have a diameter of 650,000 mi...
- The exoplanet 45 light years from earth doesn't orbit star ZQ 75..
- Of the planet orbiting star MKP 427 and the exoplanet 41 light years from earth, one is Kinucia and the other has a diameter of 243,000 mi...
- Neither the exoplanet with a diameter of 540,000 mi. nor the planet orbiting star VJD 913 is the planet 43 light years from earth..
- The exoplanet with a diameter of 345,000 mi. is 2 light years farther away from us than Hinveng..
